

## **CV INFORM**

### **Target User Profile:**

The CV is focused on the computer world, that's why it focuses on my skills as a programmer and web designer.

### **Information Architecture:**

In the upper right corner my profile picture appears along with my name so that you can quickly identify who it is. Just below my personal information whit other important information such as the languages I speak. Next to my profile picture there is a small description about me, which refers to my qualities and ambitions. Below the description I name the places where I have studied and the experience I have gained working in different places and environments. To finish at the bottom I show the programing languages that I knows visually.

### **Visual Design:**

The visual part is very marked by a very light gray background and a creamy pink to highlight the left part. The titles are highlighted with a strong gray to make them more visible. The "graphs" are scored from 1 to 5 to make it quick and intuitive.
